Description

Sonder Foundation has been founded in late 2016 when two friends – Bartosz Janczak and Roberto Machado – based in the United Kingdom and Taiwan, sharing the passion for the different expressions of art, gathered together in London, UK, to create Sonder Foundation. The initiative is focused on creating great opportunities for artists to showcase their art, as well as to serve as a bridge to invite them to interact and learn from different art cultures and backgrounds. The goal is also to reach art lovers from around the world, taking advantage of the network of artists and cultural spaces across the globe, around where its founding members move constantly seeking for new opportunities.
