## Description

Street Art United States was founded by Sami Wakim, is a platform dedicated to street art culture, where we engage more than 200,000 followers worldwide on social media. We interviewed hundreds of artists and documented their work, making it possible for these artists to share their imagery and ideas with a wider community. Our mission is to support street artists in instilling a sense of hope and history through creative expression. Street Art United States often focuses on projects that have a strong message related to relevant issues such as injustice, poverty, and racism... We've also organized a couple of street art murals in the Boston area and we've hosted local and international artists who have contributed to the flourishing street art community in the city.
